Capabilities

- Our mission is to enhance the value of projects to clients through the quality of design and thoroughness in the process.
- Our expertise reflects over 25 years of experience in the design of educational, institutional, religious, commercial, and residential renovation, restoration and new construction projects in the District, as well as regional, national and international projects.
- **We have extensive experience on government projects.**
- We are experts in examining projects quickly in all their dimensions, from detailed evaluation of client needs and objectives to planning issues to development of clear alternatives for client decision-making.
- Our school and institutional experience ranges from small projects to several over 200,000 ft.² facilities.
- We are skilled in coordinating with committees, community groups, review boards, and contractors, which is absolutely essential to maintain a smooth and trouble free planning and building process.
- We have experience designing and constructing LEED Gold and Platinum projects. Whether the final goal for the building is LEED Gold or Platinum, we will address best practices to guide and inform the design process, to produce a building that is environmentally conscious.
- We institute quality reviews of drawings at all phases of every project to ensure the quality of documentation.
- Our structured approach is designed for ongoing budget testing as projects proceed. This approach provides information to the client, and helps avoid the complexity of the Value Engineering Process.
